- Innovative full stack developer with 5 years of work experience adept in all stages of web development.
- Skilled in building scalable web and mobile applications.
- Experienced in Analysis, Design, Development, Maintenance, and Implementing Client Server applications.
- Knowledgeable in designing user interfaces, testing, and debugging processes.
- Able to effectively self-manage during independent projects as well as collaborate in a team setting.

WORK EXPERIENCE

Software Engineer, MCL Systems Ltd

Manassas, Virginia, USA - September 2015 – March 2021

- Responsible for design, development, validation and testing of software application that **monitors all the network elements in data centers**.
- Built software primarily with **C#, .NET technologies and MS SQL Server** for storing network data.
- Developed services that were capable of reporting device statuses to the database.
- Designed a **full stack web application** which processed, analyzed, and displayed the collected network information visually in terms of interactive user interfaces, charts, and graphs.
- Made use of **React and Redux** for implementing the front end of the web application and **MS SQL Server, Node JS/Express JS** for the back end.
- Ensured **cross-browser compatibility** and a **responsive website** across multiple devices.
- Reduced page load times by half in various user interfaces using popular techniques such as **caching, memorization and lazy loading**.
- Responsible for constantly updating software based on customer's technical requirements.
- Participated in regular team meetings to discuss future upgrades and necessary troubleshooting for the software and the web application.
- Involved in documentation of the product features and user manuals, developed technical sales and marketing materials for the product.
