WORK EXPERIENCE

Software Engineer, MCL Systems Ltd

Manassas, Virginia, USA - September 2015 – March 2021

- Responsible for development, validation and testing of software application that monitors all the network elements in each network using WMI and SNMP
- Primarily worked with **C#, .NET technologies and MS SQL Server** for storing network data.
- Fixed bugs and initiated redesign of existing standalone application.
- Developed a full stack web application which processed, analyzed and displayed the collected network information visually in terms of interactive user interfaces, charts and graphs.
- Made use of **React and Redux** for implementing the front end of the web application and **MS SQL Server** for the back end.
- Ensured cross-browser compatibility and responsive website with a primary focus on reducing the load time of pages.
- Responsible for developing software enhancement based on customer technical requirements.
- Participated in regular team meetings to perform necessary troubleshooting for the software and the web application.
- Involved in documentation of the product features and user manuals, developed technical sales and marketing materials for the product.
